

## Armistice Services Well Attended

Snowy wet weather did not affect the large gathering that was on hand to mark the November 11th Armistice Day service held here.

A parade was formed in the Central School yard and marched down the main street to the Roxy Theatre where special services were held under the chairmanship of Legion President Al. Krywolt.

In attendance were the Crownest Pass Band directed by Frank Edl, the Blairmore Legion and Auxiliary Color Party, the Junior Forest Wardens and the Girl Forest Guards along with veterans of World War 1 and 2 and the Crownest Pass Cadet Corps.

The gathering then proceeded to the Cenotaph where further services were held under the chairmanship of Glen Poulton that included a roll

call of first war veterans by Glen Poulton and second war led by Fred Hirat. Mayor John Holyk gave a short but impressive talk after which the placing of the wreaths was made. A salute was then completed by the firing party of the 535th Crownest Pass Cadet Corps. The Last Post and Reveille was then blown.

### VETS HONORED

All attending veterans of both wars then gathered in front of the Legion where a March Past service honoring the veterans was held by the members of the 535th Cadet Corps. The salute was taken and responded to by Legion President Al. Krywolt.

The Vets were then dismissed when they, along with their wives and guests gathered in the Legion hall to enjoy refreshments and lunch.

## Coleman Girl Graduates

Mrs. Joan Drevenak of Pincher Creek, recently graduated in nursing from the Holy Cross Hospital, Calgary. She won the bedside nursing award given by the Sisters of the Holy Cross Hospital. She is the daughter of Mrs. Stella Mraz and the late Steve Mraz of Coleman. She is on the staff of St. Vincent's Hospital, Pincher Creek.

## Memorial Dedication Service

A Memorial Dedication Service for the late Mrs. Phyllis Jenkins and other loved ones will be held in St. Paul's United Church, Coleman, on Sunday, November 24th at 7 p.m. Everyone is welcome.

## Voters Favour Money By Law

Voters in the Crownest Pass went to the Polls Wednesday, Oct. 30 and in a show of strength proprietary electors gave their support to the board of trustees by voting 70.5 per cent in favour of the board borrowing the necessary money for the new composite high school.

Construction on the school is expected to start as soon as possible and when built the establishment will serve the needs of the high school students all through the Crownest Pass School Division No. 63.

The school and equipment is expected to cost in the vicinity of \$2 million and actual cost to the local taxpayers after government grants will be in the neighborhood of \$445,000.

## Local Couple Attend Nursing Graduation Of Daughter

Miss Martha Michalski, daughter of Mr. and Mrs. Bruno Michalski of Coleman, was a graduate at the recent exercises held in the Jubilee Auditorium in Edmonton. Miss Michalski, RN, who graduated from the Misericordia Hospital, has accepted a position at the Crownest Pass Municipal Hospital.

Her graduation was attended by her parents, who also motored to Vancouver recently to attend ceremonies admitting their son, John, to the Bar Association of British Columbia. Mr. Michalski is presently practicing law in Vancouver.

Tailor-made cigarettes burn better than hand-rolled ones.

## Toronto Doctor Works on M.D. Research

Dr. Harold L. Atwood, professor of zoology at the University of Toronto, is one of a number of muscle research scientists supported by grants from The Muscular Dystrophy Association of Canada. Among the 12 nations working on the cure for MD, Canada ranks second only to the United States in the magnitude of its research operation.

## Poster Awards Made To School Contestants

Fire Chief Henry Zak, accompanied by Assistant Chief Ed Amell, Forestry Superintendent Alf Longworth and District Ranger Dick Girardi, visited the Cameron and Central Schools and the Headstart Program class to present essay contest and poster winners with their awards.

The young people were also treated to two films shown by the Forestry Department. Judging of the essays and posters was done by the teachers of the schools. In grades one, two and three winners were presented with 20-cent cash while all other young people received a quarter. Winners of the essay contest in grades 4, 5 and 6 were awarded first, second and third prizes of \$3, \$2 and \$1. Proceeds for prizes are raised by the firefighters through their annual activities.

Winners of the poster and essays were: morning headstart class, Mark Duncan, Elizabeth Bazuk, Lorraine Zmaeff; afternoon class, Jessie Burns, Steven Zur, Brenda Campbell.

Cameron School winners were grade one Rochelle Juhlin, Linda Meroniuk, Cecelia Koszegi; grade

two, Johnny Wavrean, Helen Taggart, Diane Antkowiak; grade three, Cindy Liska, Jo-Anne Graf, Pat Kemp. Cameron School essay contest, grade four, Norman Amell, Joe Plante, Larry Barrass; grade five, Sean Ingram, Kathy Bowman, Patty Meroniuk.

Central School poster winners: special class, James Burns, Melodie Franche, Janina Burns, honorable mention, Paul Samuel. Special class essays, Wade Kemp, Richard Hochajew, Jimmy Samuel.

Grade one winners were Susan Braemer, Dallas Fraser, Dean Perozak; grade two, Carrie Kimoto, Ginette Biegun, Kim Lori Tarcon; grade three, Lorraine Ash, Helen Antkowiak, Helen Strickland.

Essay winners were grade four, Harvey Pulop, Larry Robutka, Joey Paviglianti; grade five, Terry Michalsky, Patricia Taggart, Dale Kuta; grade six, Norcen Olynick, Nettie Anne Krug, James Woods, honorable mention, Joan Bohle and grade six Mary Anne Krywolt, Candice Haslett, Beverley Kimoto and honorable mention to Gary Filafilo.

## Alberta Natural Gas To Build Compressor At Elko, B.C.

Alberta Natural Gas Company will start on the construction of a new \$3 million compressor station near Elko in Southeastern British Columbia, Vice-President R. L. Winton has announced from the Company's head office in Calgary.

Mr. Winton said that the decision to proceed with construction has been made possible by the obtaining recently of the last of several governmental authorizations required for an expansion of the Company's transmission service.

The granting of that last authorization to an affiliate to import additional gas into the United States was announced recently. Previous authorizations included permits granted last year by the Alberta Oil and Gas Conservation Board and the National Energy Board to Alberta and Southern Gas Co. Ltd., the major shipper of gas through Alberta Natural's pipeline. At the same time the National Energy Board also issued a Certificate of Public Convenience and Necessity to Alberta Natural to construct the Elko Station.

Mr. Winton noted that the main equipment for the new compressor station has been purchased and that all necessary arrangements have been made to proceed with the installation.

Turbine Station The equipment to be installed at the Elko Station will comprise a Cooper-Bessmer centrifugal compressor powered by a 12,100 horsepower Rolls-Royce gas generator. The station construction contract will be awarded to Mar-

## Whist Enjoyed At St. Paul's United

St. Paul's United Church in Coleman enjoyed whist on Saturday, Nov. 2 with a very good attendance. Happy Birthday was sung to one "dear" old timer again. Winners were as follows:

Ladies First - Mrs. Helen McEwen, Ladies Second - Mrs. Josie Mills, Ladies Consolation - Mrs. Joan Brody, Men's First - Mr. A. Mickels, Men's Second - Mrs. Frances Krywy, Men's Consolation - Mr. Larry McEwen.

A delicious lunch was served as usual and we invite everyone to come to whist where we serve that good old-fashioned boiled in a sugar sack coffee.

Next whist will be Nov. 16th at 8 p.m.

Canada's forests had a major influence on early Canadian art as may be seen in the paintings of artists such as Tom Thomson, Emily Carr and the "School of Seven".

Plywood is made by gluing together thin sheets of veneer placed so that their grains are at right angles to each other.

well Construction Limited of Vancouver.

Turbine-centrifugal compressor installations of the same type were put in service previously at Alberta Natural's station at Moyie, B.C. in 1966 and at the Company's Crownest Station in 1967.

Mr. Winton said that when the new compressor installation is completed later this winter the transmission capability of the Alberta Natural pipeline will be increased to approximately 1,075,000 MCF of natural gas per day.

## Pass Arena Assn. Agree On Fees

The Arena Associations of the Crownest Pass have agreed to work jointly in the administration of the Arenas in the Pass.

Through this joint effort the arena associations have agreed on the following schedule of fees. For the sale of Season Tickets a fee of \$12 will be charged per family with single adults having to pay \$10. This year patrons purchasing a season ticket in their home town will be able to use it in any of the Arenas in the Pass. Use of season tickets in this way will come in the program of public skating.

Citizens of the Pass will be urged to take advantage of this multi-use policy.

The single administration fee for the Arenas will be:

ADULTS - .50

STUDENTS - .35

PUBLIC SCHOOL - .25

In the area of hockey the arenas have agreed on the following rental structure:

Senior Hockey - Senior Hockey players do not have to purchase season tickets to play hockey only,

and they will get their hockey practice time free of charge providing that the ice is cleaned after practice to the satisfaction of the caretaker. Home Teams of the Pass will be required to pay \$15 off the top plus 30 per cent of gate receipts per game.

Teams outside the Pass have to purchase season tickets and have to pay \$15 off the top plus 30 per cent of gate receipts per game. Practice time is free of charge providing that the ice is cleaned after practice to the satisfaction of the caretaker.

Minor Hockey - Minor Hockey Teams playing in organized leagues will be charged 30 per cent of the gate. Practice time is free of charge providing that the ice is cleaned after practice to the satisfaction of the caretaker.

The Arena Associations feel that a concerted effort of this kind will bring about a more effective administration of facilities. There is no doubt that the people involved in providing the Pass with ice facilities will require the complete support of everyone involved.

## Pass Dairy Changes Hands

Rudolf Andrist of Lethbridge has of Nov. 1st taken over the Pass Dairy Ltd. from Joe Fauville who operated the dairy since 1943.

Mr. Andrist, who is married and has two young daughters, four and six years old, has taken up residence in Bellevue. He announced there will be no changes in staff, operation or service. He came to Canada from Switzerland in 1956 and after working in restaurants and cheese factories in Ontario for some time, came to Lethbridge eight years ago, and has since worked for Purity Dairy.

Mr. Fauville took over the dairy business from Purity Dairy in 1943 and has operated it since. Still in the ranching business, Mr. Fauville plans to semi retire in the 'Pass.

## Council Notes

Joe Biegun, Coleman Gas Company foreman and Coleman Electric Light Company foreman Ernie Montalbetti reported to Council that they had both attended and successfully completed a Safety course sponsored by the WCB in the Union Hall. Both received certificates.

Reports indicated that a gas heater is required and will be purchased for installation in the compressor room at the arena. New exit lights are to be installed over doorways in the arena to meet fire regulations. Council approved both these jobs being done.

A representation was present from the Coleman Curling Association to discuss financial and other problems they are facing. The town will provide some assistance to keep the curling arena functioning.

Mayor John Holyk and incumbent councillor Victor Krywy were welcomed back to their offices as well as new councillor Peter Walker. The three men were sworn to office by commissioner for oaths, Councillor Mel Cornett.

## Grand Chief Visits Hillcrest Pythons

Grand Chief Blanche Mitchell of Red Deer paid her official visit to the Pass Pythian Sisters Temples recently.

At a special meeting in Coleman the guest was presented with a corsage after which floor work was demonstrated. Grand Chief Mitchell spoke on lodge work of the order after which Most Excellent Chief Helen Hopkins presented the visitor with a bouquet of flowers and gift on behalf of the members. Among those attending the meeting were Mrs. Mary Kosma of Lethbridge and Sisters from Bellevue and Hillcrest.

Following a banquet supper an evening of whist was enjoyed.

Superior trees are grown from selected seed.

## Willow Valley Trophy Day Set For Jan. 11th

The Willow Valley Trophy Club 20th annual judging day will be held in the Livingstone School on Saturday, January 11. A program is being planned and lunch will be served.

Competitions for trophies and prizes will again be awarded for elk, mule deer, non typical mule deer, moose, white tail deer, big horn sheep, goat, cougar, grizzly bear and black bear. Fish prizes will also be presented.

Game heads may be delivered to the Club on or before Jan. 4 or they may be left at any of the mentioned pick-up stations at Lundbreck Trading Store, Jerrys Sport Shop, Bellevue; Crownest Pass Motors, Blairmore; Rudy's Texaco, Coleman; Coop Hardware, Cowley; Civic Battery and Tire Shop, Pincher; Kory Service Station, Macleod; Peters Wheel Alignment Service, 518-5th Street South, Lethbridge; Lawrence Halmrast, Warner; A. L. Bair, Milk River and Gordon Cole, Etzikon. Heads must be at pick-up stations by noon Jan. 4 and sooner if possible. Heads will be accepted until 11 a.m. at the Livingstone School on judging day.

The entries must be accompanied by the owners name and address, bag game tag and license and the location and date where the animal was shot. Entries are not to be mounted or partially mounted unless examined by a club official prior to mounting. Entries are to be clean and free of offensive odors.

Persons holding trophies from last years event are urged to return them before judging day so that the new winners may be presented.

Officials have indicated that in the event of a tie in the fish competitions, the first entry recorded will receive priority.

Entries in the big game competitions that are large enough for official rating will be forwarded to Boone and Crockett in New York and also to the Alberta Competitions in Edmonton upon request of the owner. Boone and Crockett score charts will be used for all judging.

Further information on regulations of the judging may be obtained from the Willow Valley Trophy Club secretary Steve Kubasak at Lundbreck.

## Coleman CWL Here Blairmore Speaker

Sister Rita of Blairmore was speaker at the Coleman CWL meeting this week. For her topic she chose "You are a Witness" and elaborated on how members of the CWL can set examples for their families and others.

Plans were made for the Parish children Christmas tree party that will be held in the Outreach Hall at 2 p.m. on Dec. 15.

Lunch was served and the attendance prize was won by sister Rita.

### On The Educational Scene

We often hear the phrase that change is inevitable and truly, if we are to keep pace in this modern society, change is not only desirable but is most necessary. To say that education is the same now as it was 20 years ago is far from the truth. The society we live in is changing and the problem facing education is how to meet these changes so that our young people will graduate with the type of education that will prepare them for their role as a citizen in this new society.

During the past 10 years developments have taken in education that requires schools to change their function. There has been a rapid increase in the number of subjects that the modern high school might offer to the students. The Alberta high school program includes over 300 subjects that are available to students if space, staff, and other circumstances are appropriate. The changes in high schools with the development of vocational education have made a high school education possible for the majority of students rather than providing education for the academic or university bound student alone. Composite schools have been developed that meet the individual needs of high school students. Alberta is in the forefront in the development of educational innovation and school programs and school planning in this province are changing with this development.

The trends in modern education that are developing have been considered by your school board and administrative staff and in conjunction with the architect the

proposed school has been designed to meet these new demands. We will discuss some of these new trends in this article.

**Team Teaching:**  
 This development in education involves the use of teams of teachers who work together to provide a more efficient form of instruction. This is done by using the time and talents of teachers to provide specialized instruction and thus use the staff to the maximum extent. Each teacher is given an opportunity to perform a large variety of teaching tasks and is able to develop whatever special talents he may have to the fullest extent. Teachers work with large groups of students and small groups of students which requires an adaptable school in regard to classroom space. In a team of teachers the talents of the team are provided to the students so that each student can receive assistance in a small group and then to a large group for other instruction.

**Student Grouping:**  
 Mention has been made about small group and large group instruction above, but the conventional school is not suited to this type of educational program. In modern schools space must be flexible to provide large open areas for the large group instruction and small seminar spaces for small group instruction. This requires a flexible building and a staff that is adaptable to the individual needs of the student body.

**Laboratory Centred Schools:**  
 Schools that are geared to the new developments in education are providing larger and better school libraries. The library is the centre or hub of the school and is easily reached by classes of students or by individual students for individual study or research. The

courses in the secondary school today require students to do this individual study and modern school libraries provide study cubicles or carrels for these learning activities. Schools have been developing library areas so that space for an instructional media centre is located in or near the library. Ancillary rooms or additional classrooms are located near the library so that expansion is possible if required. The library requires high windows or the elimination of windows so that book-shelf space is at a maximum. A modern school library requires workrooms for cataloguing and student resource areas where materials and equipment are available for study and preview. As school hours and school terms change the library will be used in the evenings by senior students and adult students.

**Language Laboratories:**  
 In teaching languages new developments have changed the methods employed by teachers and now, more emphasis is being placed on the oral aspect of the language. Courses such as Oral French in the junior high school grades and progressing courses in the senior high school develop the ability to write, speak, and understand the new language to a greater degree than the methods of language instruction previously used in the schools. A language laboratory provides tape-recorder units, two-way communication from the main console to the individual student, and record playing to individual students as required. In addition the language laboratory can serve the teachers in other subject fields such as English, drama, shorthand, and so on.

**Vocational Training:**  
 There has been a rapid increase in the scope of vocational education that is offered in secondary schools today. Many high schools have space allocated to automotive, auto body repair, mechanical, electrical, welding, carpentry, business and commercial training, beauty culture, cooking and other subject fields. This provides a wider program that attracts more students and a program that keeps them in school for a longer period and prepares them for a future or further training.

The business and commercial area in our proposed school is the only vocational area that will be provided our students. Nevertheless, it will give us space and equipment for training students to accept business office or industrial positions upon graduation.

**Audio-Visual Development:**  
 Instructional methods have changed considerably with the use of movies projectors, filmstrip projectors, opaque projectors, overhead projectors, eight m.m. loop films, tape recorders, record players, radio and television programs and other forms of modern instructional equipment. The blackboard and chalk are still important teaching tools but a great many instructional aids have been added to the teaching tools that a teacher might use to make learning more effective. Schools and school systems are developing an audio-visual resource centre or instructional materials centre where all of the equipment is controlled and distributed to promote maximum efficiency.

Educational television is developing in Alberta now and its potential in teaching and learning will be very obvious in the years to come. The programs being televised now bring the teacher and student a valuable aid that provides science demonstrations, history, drama, mathematics, and indeed all subject fields in a way that gives new and lasting learning experiences.

**Semester Systems:**  
 The school system in Alberta is rapidly moving to this new form of program arrangement in the high schools. In 1967-1968 there were 97 high schools in Alberta on the semester system and now in 1968-69 there are 170 high schools or 60 per cent. of all the high schools in the province on the semester system. The semester system can be set up on a two semester plan of five months each or a tri-semester of four months each and other arrangements of the school term. In our new high school we are planning to move to the two semester system where examination or subjects can be completed in a five month period. This will provide students the opportunity to complete a high school program in a shorter time in a more flexible program arrangement. A student requiring one or two grade 12 subjects could attend in the first semester and then enter university or other institutions such as junior colleges or technical schools in the second semester.

With so much talk lately about the equal status of women I think many of us, as women, seem to have a misconception about the idea of "equality". Men and women are not equal; they are complements of one another. The male has his own role to play in society as does the female. It remains for them to recognize these designated roles and then to carry them out. In marriage then, the husband and wife are a team, a unit which cannot operate sufficiently without both partners and that the wife contributes equally to this partnership.

Within our rapidly changing society there has been a change in the authority pattern within the family. This change does not concern so much the authority of parents over children as it does the authority of husband over wife. The husband is no longer the head of the family as he was in earlier days. We are moving away from the masculine authority over dependent females that was typical of earlier times. In previous days a girl moved from her father's authority directly into that of her husband's. Now a woman can be more independent and can choose what relationship she wants with her husband through her own choice of husband. Marriage in this country is becoming and should be an association of complementary equals.

Because of changes in roles and the fact that women are playing a more important role in today's society there is still a strong tendency for wives to leave all the decision making and business undertakings to their husbands. It is in this area that I feel many wives are not carrying their share of the load. Perhaps if these women were more informed about such matters they could take some of the pressure of worry off their husband's shoulders, and increase their involvement in family living.

Because of a lack of clear cut definition of male and female roles present day family life. Men often fall back on traditional criteria of masculinity such as bread winning while they may reject new and evolving criteria. Women on the other hand, may reject traditional criteria, such as skill in homemaking, and may seek new criteria, such as success in employment.

Whatever the case may be, men and women may decrease their involvement in family living unless they come to realize that as society changes so must the family, at least in attitudes and outward appearances while the basic structure and functions remain the same.

If you are interested in becoming an informed wife, write for the pamphlet Laws of Interest to the Women of Alberta, available from my office.

...the assistant to  
Alberta's practicing  
veterinarians?

The ultra-thin slices which Laboratory Technician Mrs. Vikki Wong is cutting from a block of wax contain micro-sections of a tumour which an Alberta veterinarian has removed from a dog or cat. A complicated process of treatment and study will reveal to the experts at the Veterinary Diagnostic Laboratory in Lethbridge the possibilities of malignancy or recurrence. This information will be forwarded to the practitioner responsible for the family pet. Operated under the Veterinary Services Division of the Alberta Department of Agriculture, the laboratory maintains a "back-up" service for Alberta veterinarians, providing complete facilities and opportunity for diagnosis and treatment by provincial experts. Suspicion of cancer, poison and anaemia in household pets is duly confirmed or denied by the laboratory which also provides a complete diagnostic service for veterinarians treating farm livestock.

...an ounce of  
prevention engineer?

He stops accidents before they even have a chance of getting started. As an inspector with the Boilers and Pressure Vessels Branch of the Alberta Department of Labour, Dave Thompson is one link in a chain of control to ensure that all boilers and pressure vessels built in the province conform to rigid safety codes. He and his fellow inspectors keep a careful eye on all phases of fabrication, from the original plant to the final operation. Plans are scrutinized for adherence to the applicable code, materials and methods of construction must meet approved specifications and personnel must be properly qualified in their trades. Installed and completed units, along with their attendant piping, fittings and attachments are subjected to periodic checks by the 30 inspectors located throughout the province. From design to operation, safety standards are established and maintained by the Boilers and Pressure Vessels Branch.

have  
you ever  
met...

...a man  
who lays in  
a supply  
of firewood  
for summer?

...a pine cone baker?

Daily, Patrick Wotherpoon bakes thousands of pine and spruce cones in a 110 degree oven to force them to open up and release the tiny seeds trapped inside. Shipped to the Alberta Department of Agriculture Tree Nursery from all parts of the province, these seeds are the basis of Alberta's reforestation program. A percentage of them is stored until needed for actual seeding operations in forest regions. The remainder is used as a source for seedlings which are grown at the nursery, then shipped out for planting in logged-over areas. The services of the Tree Nursery are utilized mainly by the Alberta Forest Service but they are also available on agreement at a fee to private companies engaged in the forest industry.

...a deep-sea  
captain who  
never sees the ocean?

Although the 46-foot steel-hulled MV Athabasca sails the northern lakes and rivers of Alberta it is licensed for service on deep-sea, coastal and inland waters. Consequently, its commanding officer, Captain John R. Waniandy must hold master's papers for all three categories.

The Athabasca is one of two larger sized vessels owned by the Department of Lands and Forests and used in northern waters to transport personnel, equipment and supplies. In an area where roads just don't exist these boats have proved invaluable as a means of sustaining the numerous forestry stations, lookout posts and construction camps. But they not only service the far flung forestry establishments. They have, on more than one occasion, been called on to help in emergencies caused by natural disasters.

Both boats were constructed in their Edmonton shops by Lands and Forests personnel, the same people who build the fibreglass cupolas seen perched atop lookout towers throughout Alberta's forests.

Summer is the time when firewood is needed most... in the 240 campsites located along Alberta's highways. Oscar Sommerfeld is one of the men employed by the Alberta Department of Highways, to see that each site has its full quota of cut wood. In addition, Oscar and other members of the maintenance crews are responsible for the upkeep of the facilities provided in each highway campsite. Scattered along roads throughout the province, from main highways to forestry roads, most sites are equipped with not only cut firewood but also fireplaces, picnic tables, heating and trailer space, water, shelters, and sanitary facilities. All this is provided free to the traveler who enjoys the convenience of a comfortable site in which to spend the night, thanks to the men of the Maintenance Branch.

...a teacher  
who never  
goes to school?

Wilma Sutherland is a fully-qualified teacher who has no school and whose classrooms are scattered throughout some of the province's most inaccessible areas. She is the traveling teacher with the Correspondence School Branch of the Alberta Department of Education and her pupils are the many adults and children taking their education by "mail-order" lesson. Each year Miss Sutherland visits more than 200 pupils who live in isolated areas, are physically handicapped, confined to some sort of institution or otherwise unable to attend a regular school. She not only assists them with their lessons and helps plan future courses but is invaluable as a morale builder as well. Miss Sutherland's assistance is a part of the service of the Correspondence School Branch which allows any Albertan to obtain by mail the credit required for any level of education from grade one to High School Diploma on the same basis as students at a regular school.

## Fish And Game Task Force Brief

Presented by the Lethbridge Chamber of Commerce to MLAs of Southern Alberta — Oct. 23, 1968. Gentlemen:

Last year at this meeting, and subsequently at a Cabinet Meeting in Edmonton, this Task Force had the privilege of presenting a brief on how to stop the depletion of our trout and pheasant resources in Southern Alberta.

"In the intervening year, there has been a further decline in pheasant population, a further deterioration of game bird habitat, and a further decrease in the sports fish stocking program, with no apparent substantial reaction by the Government of Alberta. Our submission is, that investment now in upgrading our trout and pheasant resources will more than return the cost in the years to come, and that failure to act now will result in the resources being destroyed as a major industry and recreation outlet for our citizens.

The Alberta Government policy on these resources is clearly set out in a recent statement in the Government publication "Within Our Borders".

"Wildlife is one of Alberta's most valuable natural resources. Big game animals, waterfowl, upland game birds and many species of fish draw thousands of hunters and anglers to our Province annually, in addition to providing recreation for residents.

"This resource will continue to renew itself each year as long as proper habitat is available to provide shelter for mammals, birds and fish. This means that an equitable balance must be struck with the retention of land suitable for wildlife and clearing of land for other purposes. To ensure this balance is reached is the responsibility of two divisions of the Alberta Department of Lands and Forests — the Lands Division and the Fish and Wildlife Division."

We compliment the Government on taking this approach to fish

and game conservation. What is now required is a crash program to implement the policy. Unfortunately the only obvious crash is the further downgrading of programs that have produced results in the past.

Pheasant stocking this Fall is at a new low — around 3,000 birds and none released in this area. This is less than half the average of the previous years. We strongly recommend that stocking of pheasants be done on a much broader basis, at least until there is some sign of results from the new habitat management and breeding research program. What is required? — the immediate construction of a pheasant hatchery in Southern Alberta to carry on the stocking of birds, which, we understand, is soon to stop altogether from the Brooks Hatchery.

Game biologists are attempting to work with municipal and county councils on weed spray programs to have cover of fatter crops along country roadways. This is in contradiction with the policies of governing the agricultural service boards in their spraying operations, and as a result, the habitat improves tend to be classed as meddlers. And so, the game bird habitat continues to be devastated. What is the solution? One plan is to put wildlife representatives on each agricultural service board, or better still, create and support fish and wildlife conservation committees in the same way as agricultural service boards function. Certainly the key is get co-ordination at all levels between the Department of Lands and Forests, and Agriculture. Our observation is that it does not exist at present, particularly on the field level.

The stocking of trout remains at a dangerously low level. The only hatchery in the Province operated by the Government, at the Calgary Brewery, has dropped production in recent years to 2½ to 3 million trout, and from this output must be deducted the large number of diseased fish which cannot be stocked or do not survive.

For instance, some 60,000 Brown Trout destined for Henderson Lake in Lethbridge this Spring were diseased and could not be stocked. By comparison with B.C. and Montana stocking programs we should have at least two hatcheries in addition to the one at Calgary with at total annual production of 15 to 20 million.

There is a tremendous potential for upgrading sports fishing in Southern Alberta, especially in the irrigation belt where there are numerous man-made impoundments. Unlike the much larger lakes in the north of the Province, these impoundments must be rehabilitated every few years if a sports fishery is to be maintained. For example, Tyrrell's Lake some 40 miles south of Lethbridge near Highway No. 4 has had biological evaluation and some stocking. The rainbow stocked there have grown as much as three pounds in two years. The habitat is such that up to a million trout should be stocked in two successive years to establish the sports fishery. Because the biologists feel that the small number of trout available for stocking would not serve any purpose, the lake has not been stocked for two years. Tyrrell's Lake and dozens of others will therefore go without the required fingerlings purely from lack of production. The solution? — plan for two new hatcheries, build one now and get our production to at least 15 million a year. As we pointed out on many occasions, the Waterton Dam site appears to be an ideal location for a trout hatchery, and we strongly recommend that the Government earmark the capital for construction there in 1969.

This Chamber is well aware that 1968 was a deficit year, and that the prospects for a balanced budget in 1969 are not rosy. However, gentlemen, we are recommending capital outlay with proven dollar return to the Province of Alberta, not to mention the tremendous improvement for the recreation of the residents of Alberta.

The concern of many citizens

of loss of trout and pheasant of Southern Alberta at our declining fish and game resources is so deep that a number of them would be prepared to undertake the raising of private funds to be matched by the Government as a means of getting a pheasant hatchery built before our pheasants get beyond rehabilitation. Another proposal is that a special license be required for shooting pheasants, with all proceeds earmarked for hatchery construction. We commend these approaches for your study.

In summary we recommend in the strongest possible terms that the Government implement our proposals to upgrade our dwindling trout and pheasant resources by embarking on a co-ordinated crash program of habitat improvement and increased stocking.

## Thousands Volunteer For Fight Against Muscular Dystrophy

When The Muscular Dystrophy Association of Canada was formed in 1954 few Canadians had any idea of what muscular dystrophy was. Some from time to time had heard mention "creeping paralysis" — a disease as old as history. This was in fact muscular dystrophy. Since 1954 it has been discovered that there are six kinds of muscular dystrophy, and that they can be passed on from one generation to the next.

The original members of the Muscular Dystrophy Association of Canada numbered a handful of parents of dystrophic children and doctors, who were perturbed at the lack of knowledge of MD and the absence of any medical research program to deal with the disease. They accordingly summoned a medical advisory board and began to raise funds to set up a research program.

Their program of research and other services which began modestly in now budgeted at \$700,000 per annum. It has involved every major university and medical re-

search centre in Canada and a number of others in the United States, the United Kingdom, Israel, Austria, France, Australia and Sweden. Today the Muscular Dystrophy Association has a membership of several thousands.

The most serious type of MD is Duchenne. This unfortunately also the most prevalent type. It attacks young boys, gradually paralysing them from the legs up until at about age 19 they die because they are too weak to combat the common cold.

Other types of MD attack adults.

These types are not so severe as Duchenne and a person suffering from them, although permanently handicapped, may live to a reasonable old age.

It is only in recent years that we have begun to understand exactly how genetic diseases like muscular dystrophy are transmitted from parent to child, and as a result of this knowledge it is believed by many scientists that we are on the threshold of major advances in the struggle against these diseases.

## Secret Ingredient For Baby's Formula

The secret ingredient is high quality water. The compact new kitchen appliance shown here produces three gallons of it a day. Called the Culligan Aqua 1 Water Purifier, it takes out undesirable minerals, color, taste, odor, detergents, and other organic contaminants that might upset a baby's delicate digestive system. The highly purified water also makes superior coffee, tea, ice cubes, soups, reconstituted juices, and is unexcelled for just plain drinking.

\$100

grows to

\$250

with

Canada Savings Bonds

\$250 for each \$100. That's what you can get with this year's Canada Savings Bonds. Here's how.

The new Bonds have fourteen regular annual interest coupons which can be cashed each year as they come due. The first pays 5.75%; the second, 6.50%; the next three, 6.75% each, and the last nine a big 7.00% each. Total regular annual interest amounts to \$95.50 on each \$100 Bond.

If you choose you may hold all these regular annual interest coupons uncashed until your Bond matures. If you do, you will then get interest on your interest totalling an additional \$4.50 on each \$100 Bond.

At maturity, therefore, you can get back total

interest of \$150 plus your original \$100 investment. This way each \$100 Canada Savings Bond becomes worth \$250. Other denominations can grow at the same exciting rate.

Adults, children, businesses and institutions—all may buy Canada Savings Bonds. They are available in convenient amounts of \$50 up to \$50,000 for cash or on instalments, wherever you work, bank or invest. And, as always, Canada Savings Bonds are cashable any time at full face value plus earned interest.

Few investments are so profitable. None builds more surely for the future. Buy Canada Savings Bonds and make your savings really grow.

Buy yours today!

## Cooke-Trotz Vows Exchanged At St. Alban's Church

St. Alban's Anglican Church, Coleman, was the setting of a late afternoon wedding recently, when Donna Marie, elder daughter of Mr. and Mrs. Joe Trotz, exchanged vows with Leonard David Cooke of Grassy Lake, youngest son of Mr. and Mrs. Ross Cooke.

Rev. Clarence Babcock performed the double ring ceremony before the altar graced with bouquets of bronze and gold mums. Baskets of fall wild flowers and grasses decorated the church, and the pews were marked with yellow satin bows. Mr. J. Lonsbury presided at the organ and also accompanied soloist Mrs. Helen Kropinak who sang "Because" during the signing of the register.

Given in marriage by her father, the bride chose a long sleeved gown of white madras with high collar and slim fitted lines sweeping into a built in bell train. Her shoulder length veil of multi-layer illusion fell from a heart-shaped headpiece of small satin loops and dropped seed pearls. The bridal bouquet was a cascade of yellow sweetheart roses surrounding ivory cymbidium orchids.

She was attended by Mrs. Sharon Vancora as matron of honor in a floor length modified A-line gown of forest green French velvet with ruffled scoop neckline and elbow length sleeves. A ring of matching velvet centered at the back with a triple bow formed her headpiece. Bridal attendants Mrs. Carol Capron and Miss Darlene Trotz, cousin of the bride, wore gowns and headpieces of identical design in gold velvet. All carried crescent shaped bouquets of bronze and gold baby mums and yellow tea roses.

Flower girl, Miss Dixie Trotz, sister of the bride, wore a gown and headpiece similar in color and design to that of the matron of honor and carried a basket of bronze and gold mums.

The bride's mother wore a three-piece brown suit with green accessories and yellow rose corsage while the groom's mother was attired in a white suit with red accessories and a corsage of red roses.

Attending the groom as best man was his brother, Wayne, of Winnipeg. The groomsmen were Mr. Jim Sloper of Salmon Arm, B.C. and Mr. Joe Trotz Jr. The guests were ushered by Mr. Ron Townley and Gary Trotz, younger brother of the bride.

Approximately 250 guests attended the reception and dance which followed in the Coleman Elks hall. The guest book was attended by friends of the bride, Mrs. Lindy Polack, Mrs. Shirley Bevelacqua and Miss Judi Sumanik.

The bride's table was centered by a three tiered wedding cake decorated with yellow and white roses and a triple bell top. Mr. F. Capron of Blairmore acted as the Master of Ceremonies. The toast to the bride was given by her uncle, Mr. Adolf Trotz, and ably responded to by the young groom. The young couple then cut their cake with an heirloom silver knife also used at the bride's maternal grandparents wedding.

This occasion also being the bride's father's birthday, Donna rose and called on the assembled guests to join her in singing "Happy Birthday" in his honor.

For a honeymoon to points in the U.S., the bride wore a three piece cape suit of black and white muted plaid on grey, with black accessories. They will make their new home in Grassy Lake.

Out of town guests were present from Winnipeg, Ladysmith, Haney, and Salmon Arm, B.C., Lethbridge, Edmonton, Calgary, Grassy Lake, Taber and Pincher Creek.

## Mraz - Drevenak Wedding Solemnized

The Holy Ghost Roman Catholic Church in Coleman was the setting for the double-ring nuptial mass, performed by Rev. Walter Krewski, joining in the sacrament of matrimony Joan Mraz, youngest daughter of Mrs. Stella Mraz of Coleman, and Joseph Mady Drevenak, youngest son of Mr. and Mrs. Mike Drevenak of Bellevue, Alberta.

Baskets of orange and white gladiolus decorated the altar. Miss Edna Dobek, cousin of the bride, presided at the organ and soloist was Miss Bonnie Dobek, both of Blairmore.

Given in marriage by her brother, Joe, the bride chose a short sleeved A-line gown of French madras with an Empire waistline. Her attached train fell gracefully from the neckline which was edged with oriental beader. Her headpiece, a cone shaped hat with

floral attachment was completed by a four-layer elbow length tulle illusion veil. She carried a bouquet of tulleman roses.

The bride was attended by Mrs. Darlene Hillas of Calgary, as matron of honor. The bridesmaids were Miss Irene Drevenak, sister of the groom, and Miss Judy Dannatt, both of Calgary. They wore full length tangerine gowns with Chapel coats of poi de elegance, and carried bouquets of gladiolus accented with tangerine lace.

William Hillas of Calgary was best man and usher were Ryan Keen of Calgary and Brian Cechini of Blairmore.

A reception was held in the Elks hall where over 150 friends and relatives attended. Jerry Ryznar of Vancouver acted as master of ceremonies and called on Rev. Krewski to propose the toast to the bride. Miss Mary Sturko of Lethbridge was in charge of the guest book.

For her going away outfit the bride donned a coat and dress ensemble in beige and gold, with gold accessories and a corsage of white roses.

Out of town guests attending the wedding were from Pincher Creek, Kolumna, B.C., Langley, Prairie, B.C., Vancouver, Consort, Veteran, Rimby, Banff, Lethbridge, the Crowsnest Pass and Czechoslovakia.

The couple have taken up residence in Pincher Creek.

## Female Elk Permits Issued

Special female elk hunting permits were issued by the Department of Lands and Forests, Fish and Wildlife Division, in Edmonton, on Tuesday, Oct. 22. The holders of these 300 permits are allowed to hunt cow elk in Wildlife Management Unit F-300 from Nov. 2 to Dec. 14, 1968. Permit holders must also be in possession of a regular elk license and a valid elk tag in order to exercise this special privilege. Male elk may be hunted in the area without the special permit.

The female permits have been initiated this year in an effort to reduce hunter congestion and improve the quality of the sport, while at the same time insure proper harvesting of the elk herds. Unsuccessful applications for permits are being held in Edmonton in the event that season extensions or more permits are required.

## Personalities IN THE NEWS

Mr. and Mrs. Mike Kolibas of Vancouver, B.C. are visiting with the formers mother Mrs. Kolibas.

Mr. and Mrs. Jack Peever and daughter Judy of Haney, B.C. attended the wedding of Miss Donna Trotz and Mr. Len Cook.

Mr. and Mrs. Joe Wavre can visited at the home of their daughter and son-in-law Mr. and Mrs. R.V. Peske at Calgary and their son and daughter in law Mr. and Mrs. J. Wavrean jr. at Midnapore last week end.

Mr. and Mrs. Clarence Huffman recently visited their son and daughter-in-law, Mr. and Mrs. Darrel Huffman and family, at Wabamun. They also visited Mr. and Mrs. Ken Owen at Fort Saskatchewan.

Mr. William (Bill) Hoggan, an old timer of Coleman, is a patient in the Foothills Hospital in Calgary. Friends here wish him a speedy recovery.

Mr. and Mrs. T. Ledieu from Red Deer visited the formers parents, Mr. and Mrs. Ed. Ledieu.

Mrs. Gray and her son, Gilbert, were Edmonton visitors last week.

Friends are pleased to see Mr. Bob Graham around again after being a patient in the C.N.P. Hospital.

Miss Jacqueline Lant attending University at Lethbridge spent the weekend visiting with her parents, Mr. and Mrs. Ernie Lant.

Born to Mr. and Mrs. C. F. Schile at the C.N.P. Hospital on Monday, October 28th, 1968, a daughter, she will be given the name of Tammy Irene.

Mr. J. Howarth was an Edmonton visitor over the past weekend.

Mr. D. Feregotto was a weekend visitor in Calgary and attended the Calgary-Edmonton football game.

Sensitive fingers bring the world to the blind through Braille. Developed by Louis Braille before 1842, the system has gone under no drastic change to date.

### Bingo Winners Named By Elks

Winners of prizes at the Elks Bingo Night were \$10, Andy Guttman; grocery hamper, Ann Dorusak; \$10 Mrs. Parry; \$20 Nora Goulding; \$10, split, Ken Snowden, Mrs. Williams, \$18 each, Mrs. Berdusco, Mrs. Phillips; watch, Ann Dorusak; \$15, split, Mrs. Hruby, Mrs. Chabillon, Mrs. Williams; \$50, Harry Jepson; \$10, Vera Vyse; \$10, Andy Guttman; \$10, split, Mrs. Lacroix, Mrs. Poch and \$10, split, Mrs. J. McQue and Mrs. Poch. The next bingo will be held on Nov. 15 when a cash prize of \$140 will be offered for the first blackout in 57 numbers. Other prizes will include a \$50 cash prize, a \$50 decreasing value prize and a \$10 plus \$2 for each extra card bingo besides eight other prizes.

### Lions Announce Bingo Winners

Mrs. Mary Sagoff was the winner of the \$100 jackpot at the Lions Night Bingo. Other winners were \$12, Freda Taje, Marie Kinmer, Mrs. Steimachovich, Jean Hansen, Mrs. Roughhead Sr.; \$10, Mrs. Balayewich, Mrs. E. Kinmer, Jean Hansen; \$35, Joe Semenzan; \$5 Mrs. Balayewich, Irene Letcher, Sofie Lepacek and Mrs. Garner. The next bingo, Nov. 20, will feature \$100 to go, 20 six number bingos, five \$12, five \$10 and extra games according to attendance.

### 'Rudiments of Music'

For the second year the Music Division of the Cultural Development Branch will be continuing the "Rudiments of Music" Correspondence Course which was originated last year.

The reaction to the first Correspondence Course was considerably more than expected and the requests were so over whelming that a continuance was necessary.

This is an excellent way in which to acquire a basic knowledge of Music and its benefits could give those interested an appreciable enjoyment in what is the most meteoric increase in any of the modern day arts—music! This "Rudiments of Music" Correspondence Course is contained in 10 lessons. The fee is \$15 which includes text books and manuscript paper.

Applications will be accepted from all interested Albertans of over 14 years and will be forwarded on request from the:

Music Division, Cultural Development Branch, Department of the Provincial Secretary, Room 504, Financial Bldg., Edmonton, Alta.

### Watchmen - What Of The Night?

By: A. E. Bridges  
Alberta Fire Commissioner

According to provincial fire loss records, it has been found that one half of the commercial and industrial fires break out between 5 p.m. and 8 a.m. This includes properties where watchman services were supposed to be in effect. Watchmen and caretakers are sometimes found not fully capable or not properly trained for their duties. When you consider that in some plants or commercial properties the night watchman is in sole charge for about 15 hours out of 24 hours, it is clear that he has a major responsibility. Certainly, he needs to be one of the most alert and capable employees of the plant, shop or warehouse.

While we mention in particular the night watchman or caretaker, it is a fact that there are two important night watchman services - the regular night watchman and the sprinkler system with an automatic alarm but both are vulnerable when the human element is at fault and both require

top priority and supervision from management.

Last year in Alberta fires in commercial and industrial premises exceeded \$9,000,000 and a major factor in these fires getting out of control was the lack of effective watchman services. A man would be considered demented if he left half a million dollars in cash lying around without proper precaution yet what is so different when high value occupancies are left without effective janitor and night watchman services?

Now is the time to reassess watchman services following Fire Prevention Week.

### Card of Thanks

I would like to thank all the people of Coleman who supported me in the recent councillor election.

I extend a special thanks to those who were unsuccessful and hope they will try again.

I hope I can fulfil this position to the satisfaction of the community.

Peter Walker.

### CARD OF THANKS

I would like to express my sincere thanks and appreciation for the lovely shower held in my honor, and to all those who donated and sent gifts; and a very special thanks to the hostesses who made the evening such a memorable occasion.

- Pat Kapalka
